Over the last decade since Indiasoft was born, it has achieved a unique distinction and status as one of the most happening IT shows of the world, particularly for global networking of enterprise. Since its inception it has provided platform to over 2500 SMEs in India to showcase their products and solutions inviting several hundred foreign buyers to participate in the event over the last 12 years.

Over the years it has generated business worth billions of dollars, cemented partnerships between hundreds of corporations, helped in catalyzing IT revolutions in Latin America, Africa, Middle East announced S. Radhakrishnan, Chairman, Electronics and Computer Software Export Promotion Council (ESC) in his welcome address on the occasion of the inauguration of Indiasoft 2012, India's exclusive international IT exhibition and conference.

Speaking further S. Radhakrishnan urged the visitors not to overlook green starred exhibitor booths as nearly 60 IT companies were using Indiasoft as a platform to launch innovative technology, products and services. They have significant products and services to offer, he informed. And said that everyone must visit and learn about the innovations being offered by all of them.

Some of these innovative products include Telecom Spot Billing, Smart Lab, Telecom HR Processing System, Menu Appz-online restaurant billing, 'Callfreeeee' button technology for websites, School Management ERP solutions, Iris matching software including iris scanner, Business Accounting software, Insurance survey software, HEMS - Heavy equipment monitoring system, AMR – Automated Meter Reading Systems, GPS Synchronised Clock, Panache Smile PC, ThinClient, MLM – A complete solution for MLM industry, Online Exam System, etc. and others.

Giving details Shiv Shankar Agrawal, Director of Trendz Information Technologies said Telecom Spot Billing is the most innovative product. It offers printing solutions from mobile device. Labels, Bills, Inventory, Accounts and anything can be printed anywhere. It works with Bluetooth and enabled printer. It is so flexible that fully customised solutions can also be

offered. It can print text, formatted text, logo, bar code, he added.

GPS Synchronized Clocks is highly useful for maintaining server time, keeping accurate time for onboard vehicle, ships, trains, hospitals, educational institutions, banks and offices informed Sandeep Narula, Director, Atlanta Systems Pvt. Ltd. Insurance Survey software allows Insurance companies to standardize, automate and continuously improve upon their business processes related to inspection of properties and evaluating the risks. It reduces 50-60 percent reduction in overall effort to do insurance inspection and 90 percent of documentation effort informed Boobamdra Babu Ramachandran, Managing Director of Shlok Information Systems India Pvt. Ltd.

We are launching Iris scanner – eParakh here at Indiasoft. We are the first Indian company to launch it, declared Parimal R. Patel, Director, Gujarat Computer and Softwares Ltd. eParakh quickly processes eye image acquisition, encoding and internal matching. The eParakh is an elite iris biometric recognition reader that can be utilized by practically anyone 100 percent of the time.

Callfreeeee, an interactive widget for web and mobile, once integrated in your webpage, callfreeeee scans the nature of your customer's needs. It is an analytics intelligence engine which analyses and decodes your customer's behaviour. Callfreeeee allows to connect to your customers anywhere in the world. Callfreeeee free phone service links your website to your contact centre.

Visitors to your site are given the freedom to speak to a contact centre agent immediately, or at a time of their choosing. When the call is made, information about the caller is provided to the call centre agent, as he is ready to provide the necessary information and even customized response, informed representative of Urolime Technologies.
